## 6/6/2020 Zoom Meeting Minutes

### Field Day 2020 Notes

Due to wu-flu pandemic this year's field day will be limited to those wishing to stay at home and operate a station there or a few at Lake Tye Park in gazebo used in past FD's. The trailer that the club usually gets to use will not be there due to problems with closed space and social distancing guidelines. Current guideline for phase 2 opening in Snohomish County is no more than a gathering of 5 people.

Jim KI7WXT has suggested we use his Zoom account during FD for members to get regular updates as to how the bands and contacts are going and this will be available to members only, on an hour by hour basis. Use of the clubs repeater will also be taken to help with logistics of band planning and possible interference to each other during FD operations.

John AC7LC discussed that all use N3FJP logging software and at completion of FD all logs be submitted to him for submission to ARRL. John has paid up on the logging software license so all members should be able to load and run this software.

The following members have indicated they will be at the Lake Tye Park FD site:  
John AC7LC, Mike K7LLY, Fred KE7HOD , Kris N7KDM and Sharon KJ7EZB.

The following members have indicated they will be operating FD at home:  
Tom K8TOM, Steve N7SRR, Garth KA7BVS, Jim KI7WXT, Brad KE7EOF, Dave KB7GFL, Bruce W7BCW, Kathy K7THY.

Operating class using shore power is class D. Generator power class E.

There will be more Zoom meetings every Saturday morning at 9 AM to continue discussion on Field day operations and rules up until Junes regular monthly meeting on June 20<sup>th</sup>.

The Zoom meeting on 6/6/202 was recorded and is available on the W7SKY.ORG web site.
