6/13/2020 Zoom Meeting Minutes

Field Day Notes #2

Submitted by: Bruce W7BCW sitting in for absent Secretary.

A change has been approved by everyone on the Zoom meeting today to suspend FD operation at Lake Tye Park due to small number of people to help setup and the lack of public traffic from continued wu-flu pandemic conditions still ongoing even though Snohomish County has entered phase 2 of the stay at home order from the Governor. All FD operations will be from independent stations of W7SKY members and all logs will be submitted to John AC7LC and ARRL at the conclusion of FD.

Band/frequency co-ordination will be thru the Clubs 70 cm repeater or for those that have 6 meter capability use of the Clubs 6 meter repeater could be used for those too far from the 70 cm repeater antenna.

The N3FJP logging software can be downloaded and used by Club members and user name and pass code is available from John AC7LC. All logs will be submitted separately from each member to ARRL and John AC7LC, which we're actually not sure of yet. So standby for update to that question.

Station classification will be 1D, one operator on shore power or 1E , one operator on emergency power.

Dave KB7GFL being Club VP and FD Organizer will be the only one to be using the Clubs call sign W7SKY and all other members will signify affiliation to the Club during submission of logs.

At the next meeting of the Club on 6/20 at 9AM via Zoom more discussion of FD will be continued. A video of today's FD meeting is available on the Clubs website under the Field Day tab.
